

OLIVE'S CHAIR | STABLE BASE ROCKER

 MODUFORM

OLIVE'S CHAIR | STABLE BASE ROCKER

Shown with Optional Seat and Back Cushion

The elegance of traditional lines is matched with a ball bearing mechanism to produce a graceful form with fluid movement. The base of the chair remains stationary while only the upper seat gently rocks.

“Olive’s Chair” is designed for generations of comfort. The efficient motion of the mechanism reduces stress on joints, preserves chair life and minimizes wear on carpets and flooring. Sealed ball bearing bushings produce a true rocking (not gliding) motion.

Constructed of solid beech with mortise and tenon joinery further enhanced with commercial adhesives and high-torque screws.

Open sides accommodate a variety of body shapes, with an open base for easy cleaning (optional side panels are available). Arms with firm grip ends extend forward for assistance in and out of the rocker. The unique stable base leg design and space saving “footprint” also saves walls and baseboards.

Standard Features:

- Solid Beech and Beech ply from sustainable forests
- Eight contoured reverse “s” lumbar supports
- Mechanism produces true rocker motion
- Stable base contains sealed ball bearing bushings
- Closed cell foam bumper/stop
- Available in standard Moduform finishes:
Natural, Light Cherry, Cherry, Dark Mocha, Stone

Options

- Cal 133 compliance
- Moisture barrier for seat
- 1” thick seat and 1” thick back cushion for added comfort
- Locking mechanism
- Side panels for base to conceal rocking mechanism
