

Moduform pressure molds a two part, high resiliency flexible foam that, while it cures, bonds to the interior skin of our 520 series lounge furniture. The exterior polyvinyl chloride surface is either 200 mils or 250 mils thick, seamless and leather textured. No frames, no springs, no hard edges. This offers greater comfort, fluid, pick and puncture resistance and the ability to clean with steam, mild detergents and bleach-based cleaners, aiding in the control of blood borne pathogens. The base is one-piece molded high-impact plastic and includes a full perimeter gasket to prevent fluid access.
