

**SFCT01 Collegetown Chair | SFCT03 Collegetown Sofa with BG8509 Dalton Bench | BG8502HT Dalton End Tables**

Collegetown’s frame components are machined into puzzle like pieces on state-of-the-art CNC equipment to within the tightest of tolerances. During the assembly process, these components lock together and are further supported by commercial adhesives and mechanical fasteners that add to the overall frame construction. This process results in the most durable, robust and stable foundation from which to build upholstered furniture. Sinuous wire springs are added, tied together and connected to tape lined clips which prevent squeaking. This improves the longevity and overall strength. Foam is commercial grade for comfort and resiliency. Fabric is upholstered to the frame with precision for a tailored fit and finish. Collegetown TS has an integrated seat that does not remove from the frame making it the perfect solution when loose cushions are not needed.
