

FEATURES & BENEFITS

Fully Molded One Piece – No seams, no hiding contraband, no fluid penetration—just lasting safety and strength.

Polyethylene Construction – Durable, impact-resistant, and easy to clean for high-use environments.

Integrated Headboard– A gently wrapped form provides a calming sense of protection and privacy. Softly shields without feeling confined—encouraging rest, comfort, and dignity in behavioral-care settings.

Designed for Better Mobility – Allows patients and caregivers to step in closer, improving ease of movement for safer interaction, assistance, and overall care.

Integrated Fluid Channels – Direct fluids away to enhance hygiene and simplify cleanup in case of incontinence.

Pick and Puncture Proof – Built to withstand aggressive use, minimizing damage risks.

Ligature & Fluid Resistant – Prioritizes patient safety while preventing hidden risks.

Easily Clean with Mild Detergents, Steam or Bleach-Based Agents – Designed for effortless sanitation and infection control.

Secure By Design – Can be configured for fixed or weighted use to meet specific safety protocols to ensure dependable stability in every application, from high-acuity units to step-down spaces.

Deck Size – Fits 36" x 80" mattress (sold separately)

Fire Retardant – Meets strict safety standards to protect both patients and staff.

FEATURES & BENEFITS

Fully Molded One Piece – No hiding contraband, no fluid penetration—just safety and durability.

Fully Foam-Filled Core – Reinforces the one-piece structure for lasting durability and solidity, while dampening sound to preserve quiet, restorative spaces.

Polyethylene Construction – Durable, impact-resistant, and easy to clean for high-use environments.

Soothing Form, Purposeful Function – Soft, rounded geometry reduces visual tension and creates a calmer, more restorative environment—while still supporting safe, efficient room layouts.

Pick and Puncture Proof – Built to withstand aggressive use, minimizing damage risks.

Ligature & Fluid Resistant – Prioritizes patient safety while preventing hidden risks.

Easily Clean with Mild Detergents, Steam or Bleach-Based Agents – Designed for effortless sanitation and infection control.

Concealed Mounting System – Provides optional secure anchoring to enhance stability while maintaining a clean, unobtrusive design.

Fire Retardant – Meets strict safety standards to protect both patients and staff.
