

FEATURES & BENEFITS

Rotationally Molded Polyethylene Base – Built for extreme durability, resisting impact, scratching, and everyday wear.

Rotationally Molded Polyethylene Top – One-piece design with pick proof raised edges. Will contain spills. Foam filled for stability and noise mitigation.

Seamless Construction – Eliminates crevices to prevent hiding contraband and promote a hygienic environment.

Concealed & Secure Ballasting Port – Allows for added weight & stability while preventing unauthorized access.

Resistant to Fluids – Seamless base design prevents absorption, ensuring cleanliness and durability.

Easy to Clean – Base is compatible with commercial disinfectants, steam, and bleach-based agents for effortless maintenance.

Designed for Intensive Use Environments – Engineered to withstand high-traffic and unpredictable settings.

Enhanced Personal Space – Designed to create separation between users, reducing the risk of passing contraband under the table.

Mechanical Fastening – A durable attachment method that securely connects the top to the base, ensuring long-term stability.

Secure and Stable X-Base Design – Reduces tipping risks and enhances safety in high-use environments.

Aesthetically Pleasing – Combines modern, functional design with a clean, inviting appearance.
