

MODUV

UV-CURED WOOD FINISH

Natural Wood. Engineered for Everyday Performance.

ModUV combines the warmth and authenticity of real wood with the durability, consistency, and cleanability required in demanding commercial environments.

REAL WOOD. READY FOR REAL-WORLD DEMANDS.

ModUV combines the warmth and authenticity of real wood with the durability and cleanability required in demanding commercial environments. Compatible with hospital-grade disinfectants and engineered for everyday use, ModUV helps create welcoming spaces without sacrificing performance.

COMPATIBLE WITH HOSPITAL-GRADE DISINFECTANTS

Designed to withstand routine cleaning protocols, helping maintain appearance and performance in healthcare, behavioral health, education, and other demanding commercial environments.

PRECISION UV-CURED FINISH

Precision roll-coating technology delivers uniform coverage and appearance across every component while reducing variability often associated with traditional finishing methods.

DURABLE PROTECTIVE SURFACE

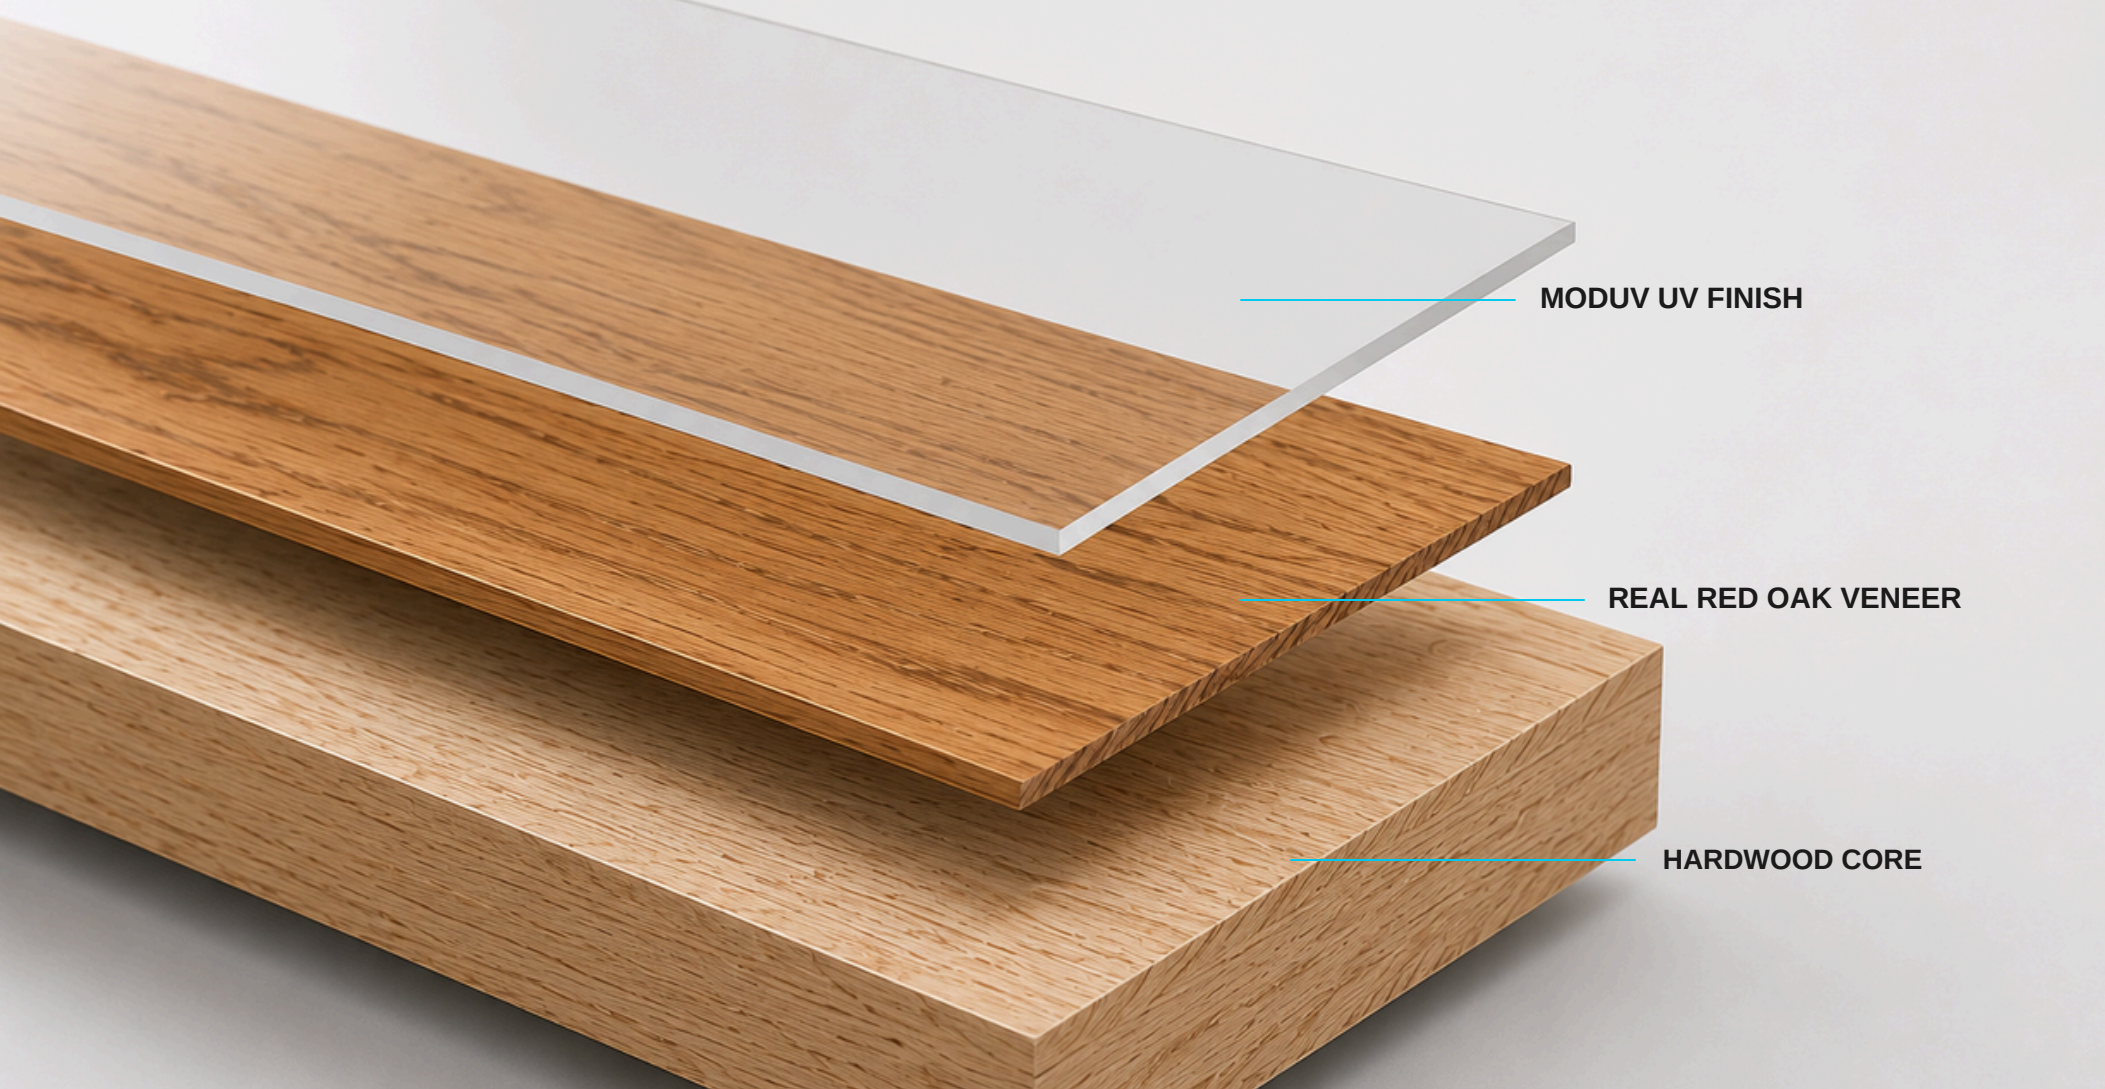

Creates a durable protective surface that helps resist wear while maintaining the natural beauty and character of real wood.

THE BEAUTY OF REAL WOOD. THE CONFIDENCE OF MODUV.

Every sheet of red oak veneer and every solid oak component begins with the same natural material. The grain, texture, and variation that make real wood unique are the qualities ModUV is designed to preserve.

ENGINEERED FROM THE INSIDE OUT.

ModUV performance begins with carefully selected materials and a layered construction approach designed for demanding commercial environments. From the hardwood core to the real red oak veneer and ModUV finish, each component plays an important role in creating furniture that is both durable and welcoming.

Together, these materials balance structural integrity, natural wood character, and long-term performance. The result is furniture that delivers the warmth of real wood while meeting the durability, maintenance, and appearance requirements of demanding commercial environments.

REAL RED OAK VENEER

Natural wood provides warmth, character, and authentic grain variation.

PRECISION ROLL APPLICATION

Controlled application helps create uniform coverage and appearance.

UV CURING

UV technology rapidly hardens the finish to create a durable protective layer.

DURABLE FINISHED SURFACE

The result is a consistent finish that enhances and protects real wood.

PRECISION APPLIED. CONSISTENT RESULTS.

ModUV combines precision roll-coating technology with UV curing to create a durable, consistent finish that enhances the natural beauty of real wood. Controlled application and curing help deliver reliable appearance, long-term performance, and repeatable quality across every component.

WHY IT MATTERS

The result is furniture that combines the warmth and authenticity of real wood with the consistency, durability, and cleanability required for healthcare, behavioral health, education, and other demanding commercial environments.

MODUV ACROSS THE COLLECTION

ModUV is used throughout ModuForm's wood furniture collections, providing a consistent finish system across bedrooms, storage, casegoods, and common-area furniture. From solid red oak components to real red oak veneer surfaces, ModUV delivers a unified appearance, durability, and cleanability across the collection.

SOLID RED OAK COMPONENTS

Applied to carefully crafted solid oak elements where durability, character, and long-term performance are essential.

REAL RED OAK VENEER PANELS

Natural red oak veneer preserves the warmth, texture, and authentic appearance of real wood while supporting consistent quality across furniture collections.

COORDINATED COLLECTION DESIGN

A unified finish system helps create a coordinated appearance across ModuForm furniture collections while delivering dependable performance in demanding environments.

MODU FORM[®]

NATURAL WOOD. ENGINEERED FOR EVERYDAY PERFORMANCE.

ModUV combines the warmth and authenticity of real wood with the durability, consistency, and cleanability required for demanding commercial environments.
